The Community Cancer Programs Network

What is the Community Cancer Programs Network (CCPN)?

The Community Cancer Programs Network is a longstanding and innovative program of CancerCare Manitoba that works in partnership with the Regional Health Authorities (RHAs) to enable patients to receive their cancer care and treatment closer to home.

Is a Community Cancer Program for you?

Most cancers can be treated safely in a community site. Your family doctor or surgeon will refer you to a cancer specialist (oncologist) in Winnipeg. Your oncologist plans your treatment and together with you, decides on the best location for your care. You may be eligible for treatment at a CCP . . . just ask your oncologist if this is right for you.

Where are the Community Cancer Programs (CCPs) located?

CCPs are outpatient units located in community hospitals. Currently, there are 16 CCPs within the Community Cancer Programs Network and 1 Community Cancer Resource & Support Program (CCRSP).

The first CCRSP opened in 2010 in Eriksdale and offers a range of supportive care services from pre-diagnosis through survivorship or palliative care and bereavement. Unlike the CCPs, the CCRSP does not provide chemotherapy treatment.

Who will care for you at the Community Cancer Program?

If you are referred to a CCP, you will be cared for by a team of doctors, nurses, pharmacists, social workers and other health professionals who have received specialized training in oncology.

Your cancer specialist (oncologist) will maintain ongoing contact with the CCP Team and retains overall responsibility for your care.

What if you have other needs?

Other support services may be available in your community for you and your family (e.g. cancer support groups, psychosocial support, spiritual support, nutritional counseling, volunteer drivers, palliative care).

Just ask your CCP staff or contact Patient & Family Support Services at CancerCare Manitoba at 1-866-561-1026 (toll free) or at 204 787-2109 (direct).
