

Interpreter Services

**What language do you speak at home?
If you need an interpreter, we can help!**

It is important that you and your family are able to ask questions and get answers about your health in your own language.

CancerCare Manitoba can arrange to have a trained Health Interpreter from the Winnipeg Regional Health Authority (WRHA) at your appointments who:

- Can come to your appointment or help over-the-phone
- Are available for many languages including sign and Indigenous languages
- Can help you ask about your treatment, attend counselling and more

There is no cost to patients for interpreters.

Ask your Health Care Provider for information on the Language Access program.
