ColonCheck Screening Pathway

Eligible Population*
Age 50-74

↓

FOBT

- **Normal** (Negative) → **Reinvite in 2 years**
- **Abnormal** (Positive)
- **Indeterminate** → **Repeat FOBT**

Abnormal FOBT
result letter is sent to the
primary care provider (PCP)

↓

**Patient is informed of
abnormal FOBT result**
by telephone and letter, and
follow-up process is discussed

↓

- **Colonoscopy completed**
  - **Normal colonoscopy** or other pathology not requiring surveillance → **Reinvite in 5 years**
  - **Abnormal colonoscopy** (cancer, adenoma, or other pathology requiring follow-up)
- **Colonoscopy not completed**
  - PCP or ColonCheck nurse practitioner may refer for a different test as appropriate (e.g. CT colonography)

PCP receives a copy
of colonoscopy and
pathology results

Endoscopist and PCP
arrange any necessary
follow-up testing, treatments,
and future surveillance

↓

Patient not recalled by ColonCheck
for future FOB testing
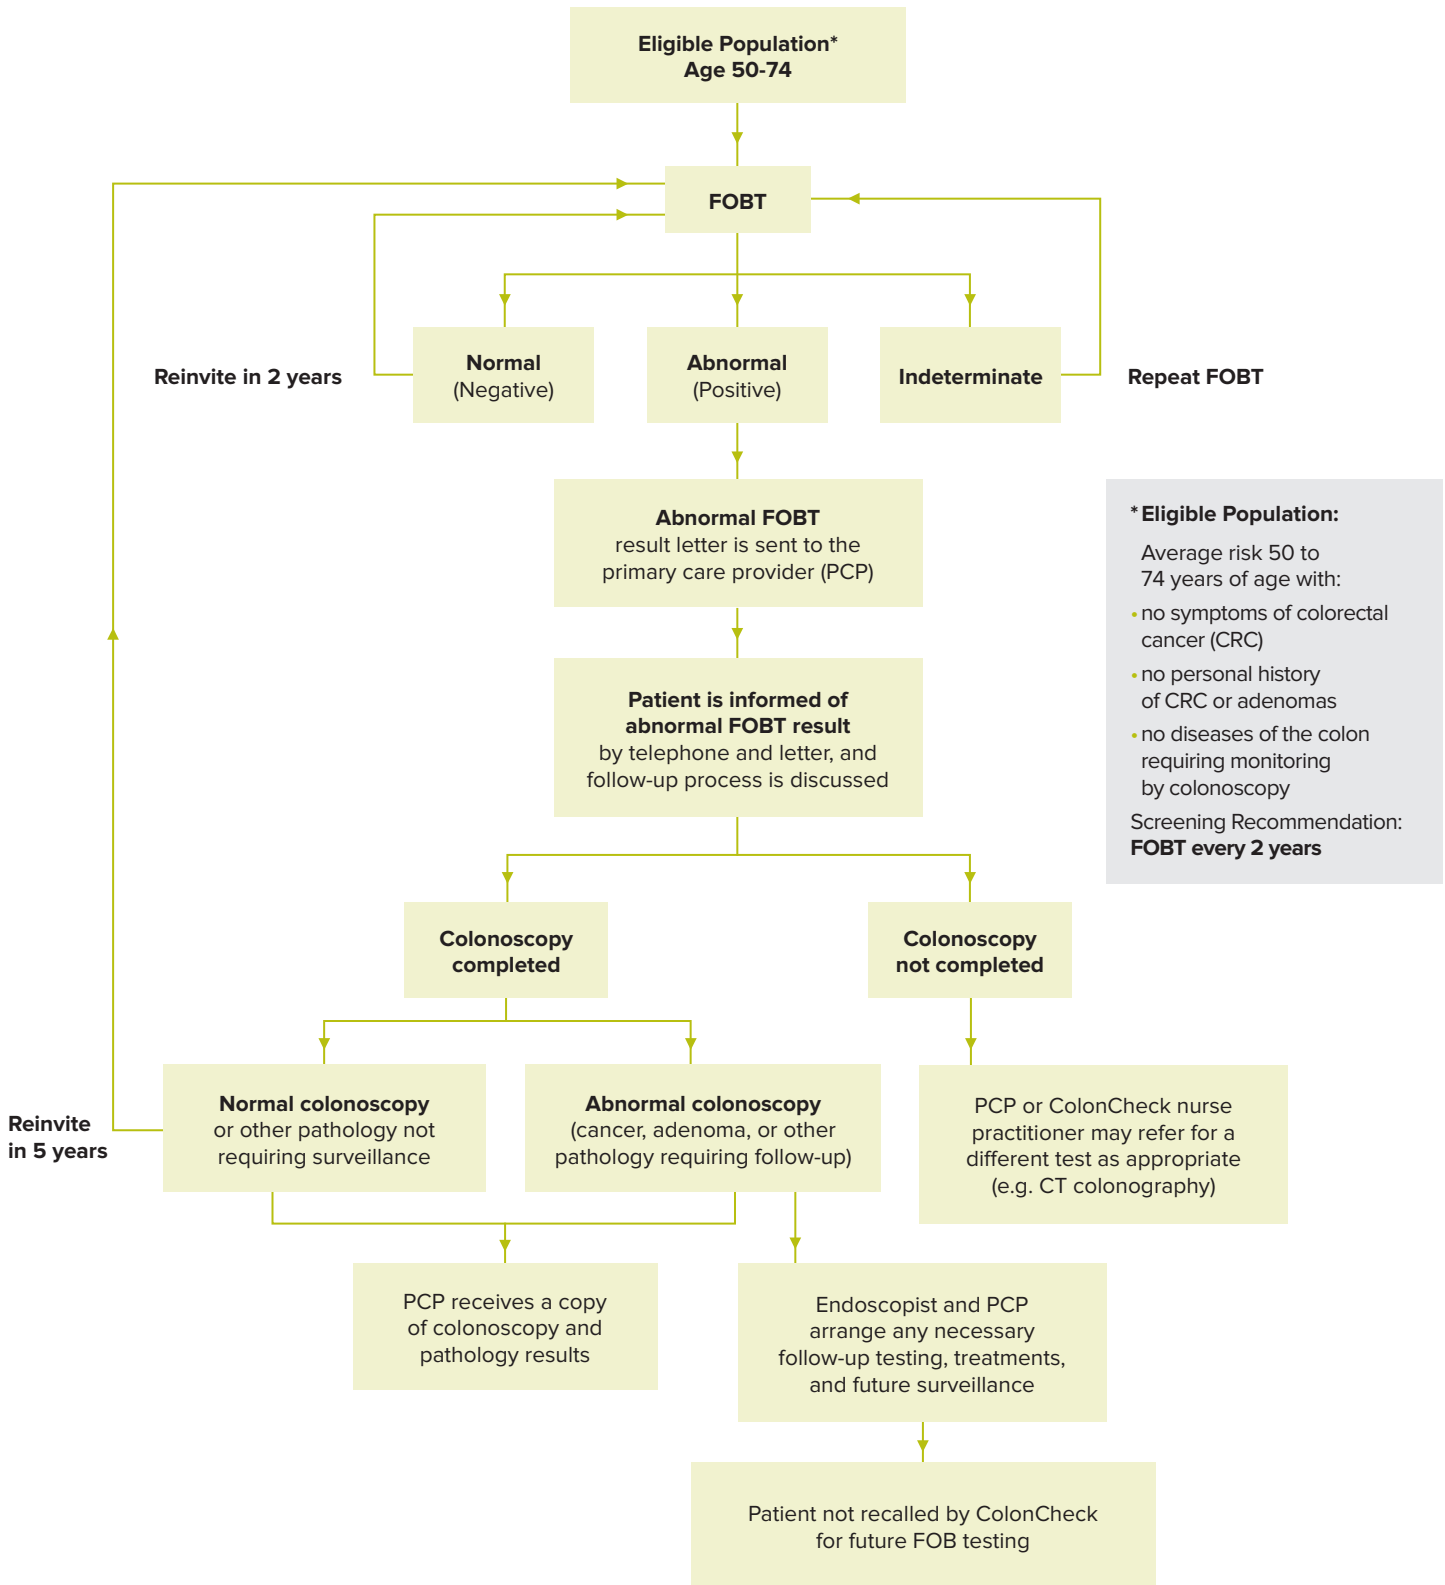

---

*Eligible Population:

Average risk 50 to
74 years of age with:

- no symptoms of colorectal cancer (CRC)
- no personal history of CRC or adenomas
- no diseases of the colon requiring monitoring by colonoscopy

Screening Recommendation:
FOBT every 2 years
