ANNUAL REPORT GUIDE:

INCIDENCE DATA: Cancer cases diagnosed in the 2000 calendar year.

MORTALITY DATA: Cancer cases that died in the 2000 calendar year but not necessarily diagnosed in that year. This information has been provided to us from the Vital Statistics department, Province of Manitoba. The totals in the summary pages 3-6 include all cancer deaths occurring in the Province.

POPULATION DATA: Data is based on the Statistics Canada population-estimates for Manitoba.

RATES: Rates are calculated by dividing the number of cases (incidence and mortality) identified by the number of individuals in that specific category (age/sex/region) multiplied by 100,000.

CANCER INCIDENCE AND MORTALITY: Tables of incidence and mortality are categorized in this report according to the ICD-9-CM disease coding system. ICD-9-CM stands for International Classification of Diseases 9th Revision Clinical Modification.

NOTE: All statistics in the body of the annual report include Manitoba residents only.
