18 of the 304 women screened at mobile sites in the region in 2014 were 70 years of age or over

RHA Screening Participation Rates
(BreastCheck’s goal is to screen 70% of the population of women age 50-69 every 2 years.)
- Screening rates for women 50-69 years of age

[Bar chart showing screening rates for different communities]
It takes the effort of the entire community to make mobile screening a success. Here are some of the regional highlights for 2014:

- In BRHA, compared to 2012:
  - Regional breast screening rates decreased by 5% (47% in 2012 to 42% in 2014)
  - The population of women age 50 to 69 increased by 246 women (3030 in 2012 to 3276 in 2014)
    - BreastCheck screened 50 fewer women age 50 to 69 (1422 in 2012 to 1372 in 2014)
  - The following communities (with 50 or more women age 50 to 69) increased their screening rates by 5% or more as compared to 2012:
    - Oxford House

- In 2014 the following communities organized group trips to screening:
  - Garden Hill First Nation
  - Wasagamack First Nation
  - O-Pipon-Na-Piwin Cree Nation (South Indian Lake)

- BreastCheck coordinates chartered flights to the closest screening site for communities that do not have road access. In 2014 the following communities participated:
  - Barren Lands First Nation (Brochet)
  - Northlands First Nation (Lac Brochet)
  - Sayisi Dene First Nation (Tadoule Lake)
  - God’s Lake First Nation
  - Red Sucker Lake First Nation

Despite being invited to participate, no women from Manto Sipi Cree Nation (God’s River) got on the plane.
