***Prior to 2010, there was a mobile site in Pukatawagan. In 2010 the mobile site was discontinued and women were flown to Flin Flon

85 of the 895 women screened at mobile sites in the region in 2012 were 70 years of age or over

RHA Screening Participation Rates

- Screening rates for women 50-69 years of age

The Program's goal is to screen 70% of the population of women 50-69 years of age every 2 years.

It takes the effort of the entire community to make mobile screening a success. Here are some of the regional highlights for 2012:

- Compared to 2010:
 - Regional breast screening rates decreased by **2%** (59% to 57%).
 - The population of women 50 to 69 years of age increased by **89 women** (2461 in 2010 to 2550 in 2012).
 - BreastCheck screened **17** more women 50 to 69 years of age (1444 in 2010 to 1461 in 2012)
 - The following communities increased their screening rates by 5% or more:
 - Channing
 - Grand Rapids
- BreastCheck encourages community organized group trips to help local women get to the closest screening site. In 2012 the following communities participated:
 - Cormorant
 - Easterville
 - Moose Lake
- BreastCheck organizes and funds flights from women from select communities to get to the nearest screening location. In 2012, BreastCheck flew:
 - 29 women from Pukatawagan to Flin Flon
- A new screening site was established in Opaskwayak Cree Nation (OCN). Thank you to OCN for opening your doors to women from OCN, The Pas, Cormorant, Easterville, and Moose Lake.
