390 of the 2393 women screened at mobile sites in the region in 2011-2012 were 70 years of age or over

RHA Screening Participation Rates

- Screening rates for women 50-69 years of age

The Program's goal is to screen 70% of the population of women 50-69 years of age every 2 years.

It takes the effort of the entire community to make mobile screening a success. Here are some of the regional highlights for 2011-2012:

- Compared to 2009-2010:
 - Regional breast screening rates decreased by **3%** (60% to 57%).
 - The population of women 50 to 69 years of age decreased by **107 women** (9885 in 2010 to 9778 in 2012).
 - BreastCheck screened **371** fewer women 50 to 69 years of age (5930 in 2010 to 5559 in 2012)
 - The following communities (with 50 or more women ages 50-69) increased their screening rates by 5% or more:
 - Marquette
 - Argyle
 - Fisher Branch
 - Koostatak (Fisher River)
 - Ashern
 - Moosehorn
 - Erksdale
 - Inwood
- BreastCheck encourages community organized group trips to help local women get to the closest screening site. In 2011-2012 the following communities participated:
 - St. Martin First Nation
- Spring and summer flooding created some challenges for women accessing screening.
- BreastCheck staff made over 700 calls to overdue women to fill unused appointments. This resulted in more than 60 appointments being filled.
- Interlake health staff and the community worked hard on short notice to try to fill the Selkirk mobile clinic – thank you to all who helped!
