

### **Cancer screening:**

- is for people who feel well,
- can prevent some cancers by finding and treating early changes before they grow into cancer, and
- can find cancer early when treatment may work better.

## BreastCheck

Most women age 50-74 should have a mammogram (breast x-ray) every 2 years.

## CervixCheck

Most women age 21-69 who have ever had sexual contact should have a Pap test every 3 years.

## ColonCheck

Most men and women age 50-74 should do a home screening stool (poop) test every 2 years.
