

# Become a Public Advisor!

Join our current project that is looking at how to do lung cancer screening in Manitoba. The project will develop materials to help find lung cancer earlier.

We need volunteers who:

- are **current or former smokers** who smoke/smoked for approximately 15+ years (throughout their lifetime)
- have limited knowledge about cancer

Public Advisor volunteers will participate by telephone or online from home.

For more information or to apply, email
