151 of the 1517 women screened at mobile sites in the region in 2013 were 70 years of age or over

RHA Screening Participation Rates for women 50 - 69 years of age

BreastCheck's goal is to screen 70% of the population of women age 50-69 every 2 years.

It takes the effort of the entire community to make mobile screening a success. Here are some regional highlights for 2013:

- 53% of women 50 - 69 years of age in the Winnipeg RHA were screened at BreastCheck between March 2012 - March 2014
 - Provincial rate = 53% (Jan/2010 - Dec/2011)
- Compared to 2011:
 - Regional breast screening rates decreased by 4% (53% in 2011 to 49% in 2013)
 - The population of women age 50 to 69 increased by 4,539 women (80,139 in 2011 to 84,678 in 2013)
 - BreastCheck screened 769 fewer women age 50 to 69 (42,215 in 2011 to 41,446 in 2013)
 - Transcona (R2C) was able to increase their screening rates despite an overall decrease for the city.
- BreastCheck returned to Access Transcona for a second year in a row to accommodate the community demand. Thank you to the staff at Access and to you community for welcoming us again - see you again in 2015!
