

Mask Use and Protecting Immunocompromised Patients

By CCMB Communications & Public Affairs

Fri May 05 15:00:00 CDT 2023

On May 10, 2023, mask and PPE requirements will be lifted (<https://sharedhealthmb.ca/news/2023-05-03-masking-requirements-update/>) in most areas within the Manitoba health system. Please note that a more gradual return to normal is being taken at CancerCare Manitoba facilities.

To continue to protect our vulnerable immunocompromised patient population who come to us for cancer care and treatment, patients, companions and staff will continue to wear masks in all patient care areas.

Ensuring the safety of our immunocompromised patients continues to be our utmost priority. Thank you for joining us in this continued commitment to ensuring our facilities are safe for the most vulnerable patients.
